

CTC Cylinder Cart 10-10

Our Cylinder/Medical Gas Carts are specifically engineered to be ergonomically safe and flexible for industries such as maintenance shops, welding facilities, medical facilities, and cylinder “oxygen and acetylene” tank operations. Manufactured in the United States, this product is equipped with our patented “No Load Bearing” three-wheel design allowing for a complete 360 degree rotation that fully eliminates having to tilt the cart. The CTC Cylinder Cart 10-10 is built specifically for smaller to medium sized tanks and has the option to add a single lever lowering device for easier loading. This cart was developed and sold with our customers and their employees’ safety in mind.

Other Features Include:

CUSTOMIZABLE COLORS

TOOL TRAY

HEAVY DUTY STEEL CONSTRUCTION

STRAP LOCKING SYSTEM & WHEEL BRAKES

NO TILTING REQUIRED
